

Group Mission

Hitachi Via Mechanics -- Emerging Technology Group was formed after the acquisition of NanoVia LP, in 2003. Our highly skilled technical people are dedicated to ensuring Hitachi Via Mechanics maintains its technical leadership within its markets worldwide. Our insight and involvement in laser and optical programs has significantly increased both system endurance and performance.

Our greatest asset is the technical expertise of our people. Our involvement spans all facets of laser systems:

- Laser processing systems engineering, testing, analysis, and development
- Acquisition support
- Optical certification
- Laser process development
- Application of new technologies. The technology developed here supports both existing and next-generation laser and mechanical drilling systems
